

Fiber Optic Splicing Trailer

7 Series

7 X 12

Quality Trailer Construction:

- <u>ALL-</u> aluminum, low weight construction provides cost-effective, eco-friendly durability and high payload capacity advantages.
- The roof on the Fiber Optic Splicing Lab is a single, seamless sheet of 18-gauge aluminum with beveled comers overlapping the side walls.
 The sheet is bonded to a system of formed aluminum trusses on a welded frame.
- Walls and ceiling are insulated with R-11 insulated wall board, providing a comfortable and clean environment
- Solid floor decking made from extruded aluminum
- Medium voltage wiring is enclosed in metallic conduit for safety in addition to providing for future expansion / maintenance requirements

The proven line of fiber optic splicing labs!

Cub Series

Fiber Optic Splicing Trailer

6 X 8

Quality Trailer Construction:

- <u>ALL-</u> aluminum, low weight construction provides cost-effective, eco-friendly durability and high payload capacity advantages.
- The roof on the Fiber Optic Splicing Lab is a single, seamless sheet of 18-gauge aluminum with beveled corners overlapping the side walls.
 The sheet is bonded to a system of formed aluminum trusses on a welded frame.
- Walls and ceiling are insulated with R-11 insulated wall board, providing a comfortable and clean environment
- Solid floor decking made from extruded aluminum
- Medium voltage wiring is enclosed in metallic conduit for safety in addition to providing for future expansion / maintenance requirements

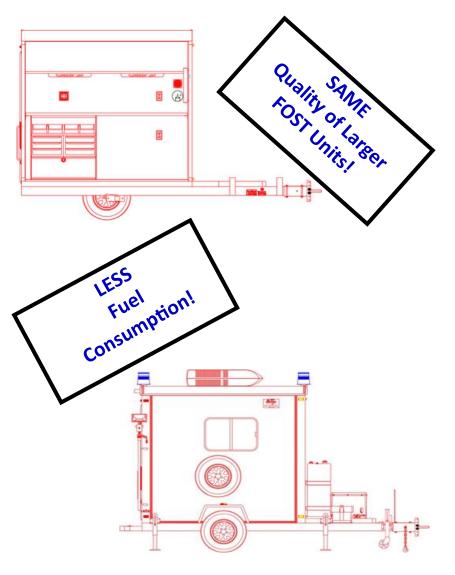

The proven line of fiber optic splicing labs!

All Trailers Include:

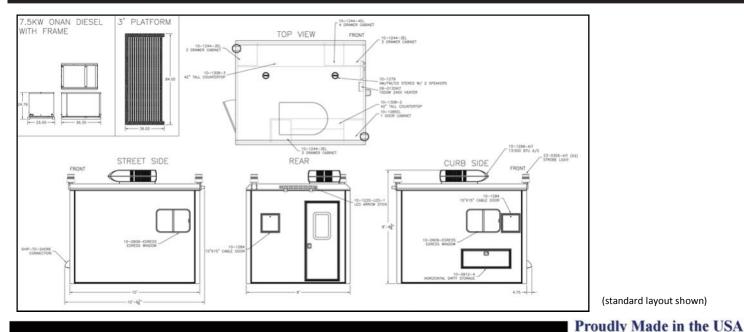

- 5.5 kW Generator
- Custom cabinets with organizational drawers & bins
- Abundant lights and electrical outlets
- 9,200 BTU roof mounted air conditioning unit
- Heavy-duty rubber floor mat
- Carbon monoxide alarm
- R-11 Insulation
- DOT LED lighting package
- 3,500 lb axle
- Power converter
- 20 gallon fuel cell
- · All aluminum frame, floor, walls & roof
- Strobe Light
- Large tinted window
- Ship to shore power connection

Fiber Optic Splicing Trucks

(standard layout shown)

8 X 10

Same quality construction as our splicing trailers now on a truck!

- Fully enclosed 8 foot by 10 foot box truck equipped for the splicing of fiber optic communications cable.
- The unit is fully self-contained and includes an electric power source, environmental controls, work surfaces, and equipment storage areas.
- The roof of the lab is a single, seamless sheet of 18 gauge aluminum with beveled corners overlapping the side walls. The sheet is bonded to a system of formed aluminum trusses on a welded frame.
- All power wiring is enclosed in metallic conduit for safety in addition to providing for future expansion / maintenance requirements.
- GFI protected circuits as well as all other circuits are split for load balance.
- A comprehensive list of optional equipment is available and can be installed during construction to accommodate all of your needs.

Ability to customize to the needs of the customer!
